# Nuventive Impact

Improve Performance with Timely Metrics from Virtually Any Data Source

Nuventive Impact operates in conjunction with Nuventive Improve to tie visual data views directly into your performance management, strategic planning, and academic or administrative outcomes assessment processes using Microsoft Office 365 / SharePoint technology. Nuventive Impact brings your data and business intelligence together in a single place where people throughout your institution can take effective, coordinated action toward meeting your key goals.

Nuventive Impact displays information that's relevant for each user in an interface that also ties together data from other administrative and academic systems. With the right information at their fingertips, your stakeholders are empowered to make data-informed decisions that help them:

- + Align their activities to your mission and high-level goals.
- + Make smart course corrections along the way.

# **Key Capabilities**

#### Any Data to Any Plan

Configure Nuventive Impact to provide views into metrics such as student success, enrollment, or diversity by bringing together data from one or more enterprise systems that help you to determine if you are meeting your goals. Any information that can be displayed in a Microsoft SharePoint Web part or standard iframe can be brought into Nuventive Impact, including business intelligence views or even a Microsoft Excel spreadsheet with information that is being monitored by a single unit.

#### **Timely, Relevant Metrics**

Associate visual data with relevant planning and assessment activities. Craft strategies with a side-by-side view of supporting data. Archive a snapshot of that data along with the associated actions so that you can understand how decisions were made.

#### **Metrics Tied to Institutional Plans**

Everyone's input on metrics are rolled up to one or more plans to which those metrics are related.

## **Nuventive Impact Benefits**

- Make better use of data throughout your strategic planning and assessment processes
- + Drive a bigger impact from business intelligence investments
- + Foster collaboration among key stakeholders
- + Increase faculty and staff engagement
- Save time and money with less need for training

#### **Nuventive Improve Access**

Through Microsoft Office 365 / SharePoint, easily view and modify plans, manage assignments, record data, store observations, and run reports.

## **Role-based Views**

Data and processes are targeted to the specific planning or assessment unit/role of the user.

## Intuitive Interface

Nuventive Impact utilizes familiar Microsoft features such as tabbed spreadsheets.

## Deployment in Your Data Center or as Software-as-a-Service

Nuventive Impact runs in Microsoft Office 365 (SharePoint Online) or SharePoint 2013.

Nuventive offers strategy and technical services that help you to identify your stakeholders' data needs and to integrate the appropriate data sources through Nuventive Impact.
