

## Technical Specifications

	Minimum Requirements	Comments
Delivery	<ul style="list-style-type: none"> <li>Windows or macOS with supported Internet browser</li> </ul>	Essential & Premier Platform Editions are 100% Cloud based SaaS (Software as a Service), running completely in Microsoft Azure. No local server, or end user installation required. No interaction or maintenance required from institution's IT after initial configuration.* Site and Platform Edition databases managed by Nuventive.**
Authentication	<ul style="list-style-type: none"> <li>User email address should match domain</li> <li>Institution must be using Azure Active Directory (<b>AAD</b>), or an identity provider (<b>IDP</b>) that supports SAML2</li> </ul>	<p><b>For institutions using AAD</b> (preferred method): the Platform Editions are authorized by the institution's Azure Active Directory Administrator.</p> <p><b>For institutions not using AAD:</b> SAML2 authentication is supported using an identity provider such as OKTA.</p> <p>See authentication supplement for more detail.</p>
Client Browser	<ul style="list-style-type: none"> <li>Chrome</li> <li>Microsoft Edge</li> <li>Mozilla Firefox</li> <li>Safari</li> </ul>	Nuventive supports selected versions of Chrome, Microsoft Edge, Mozilla Firefox, and Safari. Nuventive generally works to be compatible with new versions of these browsers following their release but in advance cannot make any guarantees regarding timing or specific versions. Users will connect to their Platform Edition by opening an Internet browser and connecting to <a href="https://solutions.nuventive.com">https://solutions.nuventive.com</a> . All data transmits over https.
Data / Storage	<ul style="list-style-type: none"> <li>Microsoft Azure SQL managed by Nuventive</li> <li>No local / server storage required</li> </ul>	Platform database backups can be restored down to the minute, for the previous 35 days. Each institution's database is hosted in a secure environment with automatic geographic redundancy.*** All Essential & Premier Edition data is stored in Microsoft Azure, eliminating the need for local storage.

\* During initial configuration, institution AAD or IDP administrator required for application authorization.

\*\* Site monitoring included in Nuventive Platform subscription.

\*\*\* Azure SQL and Database backup redundancy included in Nuventive Platform subscription.
