FOR IMMEDIATE RELEASE

### **Eastern Washington University Selects Nuventive to Support Institution-Wide Accreditation and Program Review**

*After Exhaustive Competitive Analysis, Nuventive Unanimously Chosen as Centralized Solution for Academic and Non-Academic Programs*

Pittsburgh, PA – October 28, 2020 – Nuventive, a planning and improvement software leader for higher education, announced today that Eastern Washington University (EWU) has selected the Nuventive Improvement Platform to streamline institution-wide accreditation processes for the Northwest Commission on Colleges and Universities (NWCCU) standards, as well as program-level standards.

The Nuventive Improvement Platform helps higher education institutions use information to innovate and continuously advance their most pressing initiatives, from strategic planning to accreditation, learning outcomes, program review, and more.

“As we’re approaching the end of our 7-year cycle with NWCCU, our leadership recognized the need to do more to support various program accreditation standards as well as the NWCCU accreditation standards,” said Brad Christ, AVP for Information Technology and CIO at EWU. “We looked at the leading players in the market and what our colleagues in Washington state recommended, and we unanimously chose Nuventive.”

Nuventive enables institutions and individuals in higher education to plan more consistently, collaborate more effectively, make smarter decisions, and ultimately, support data-informed, goal-aligned performance.

“With Nuventive, we could track academic and non-academic programs across the entire campus for virtually what we were spending on just a few individual program-level accreditation tracking tools,” said Christ, who had previously used the solution at Southern Oregon University. Nuventive’s long-standing leadership was also a factor.

The Nuventive Improvement Platform:

- Supports any planning, improvement, or transformation initiative on campus or system-wide.
- Brings structure and continuous improvement to the full lifecycle of planning, collection, analysis, action, and evaluation.
- Builds individual and institutional capabilities for improvement that can be applied to future initiatives.

“We’re delighted to welcome EWU to the growing Nuventive community,” said Nuventive CEO Dr. David Raney. “We look forward to making it easy for them to drive continuous quality improvement in their organization by bringing business process and information together in an easy-to-use, transformative way.”
